

Global Land Ice Measurements from Space

Publisher: Springer Praxis Books, Subseries: Geophysical Sciences

ISBN: 978-3-540-79817-0

Editors: Jeffrey S. Kargel, Gregory J. Leonard, Michael P. Bishop, Andreas Kääb, and Bruce H. Raup

CONTENTS

Dedication

Preface (*Hugh H. Kieffer*)

Prologue: Scientific and public perceptions about the importance of fluctuations of glaciers and ice sheets (*Jeffrey S. Kargel*)

- 1.1 Early scientific recognition of the significance of glaciers
- 0.2. The practical and perceived importance of glaciers today
 - 0.2.1. Modern understanding of climate change due to greenhouse gases and other causes
 - 0.2.2. Modern impacts of changing glaciers and ice sheets on people
 - 0.2.3. Recent public perceptions about the importance of glacier fluctuations.
 - 0.2.4. Time to move on
- Acknowledgment
- References

Part I Glacier Monitoring and Fundamentals of Glacier Remote Sensing (or Glacier Monitoring and Satellite Remote Sensing of Glaciers)

1 Introduction: Global Glacier Monitoring - a Long-Term Task Integrating In-Situ Observations and

Remote Sensing (*Michael Zemp, Richard Armstrong, Isabelle Gärtner-Roer, Wilfried Haeberli, Martin Hoelzle, Andreas Kääb, Jeffrey S. Kargel, Siri Jodha Singh Khalsa, Gregory J. Leonard, Frank Paul, Bruce H. Raup*)

- 1.1 Why this Book?
- 1.2 Perennial Surface-Ice on Land
 - 1.2.1 Definitions
 - 1.2.2 Global Coverage
- 1.3 Glaciers and Climate
 - 1.3.1 Formation of Glaciers and their Dynamical Controls
 - 1.3.2 Glacier Reactions to Climate Change, and Response Times
 - 1.3.3 Reporting Glacier Change Rates
- 1.4 International Glacier Monitoring

- 1.4.1 History of the International Glacier Monitoring in the 19th and 20th Century
- 1.4.2 The Global Terrestrial Network for Glaciers (GTN-G)
- 1.4.3 Available Data Sets
- 1.4.4 Challenges of the 21st Century
- 1.5 Glacier Observations from Space
 - 1.5.1 Satellite Observations in GTN-G
 - 1.5.2 Possible Applications
 - 1.5.3 Challenges
- 1.6 Integrative Glacier Change Assessments
- 1.7 Synopsis and Organization of the Book
- 1.8 Conclusions
- Acknowledgments
- References

2 Theoretical Foundations of Remote Sensing for Glacier Assessment and Mapping (*Michael P. Bishop, Andrew B.G. Bush, Roberto Furfaro, Alan R. Gillespie, Dorothy K. Hall, Umesh K. Haritashya, John F. Shroder Jr.*)

- 2.1 Introduction
- 2.2 Radiation-Transfer Cascade
 - 2.2.1 Solar Irradiance
 - 2.2.2 Surface Irradiance
 - 2.2.2.1 Direct Solar Spectral Irradiance
 - 2.2.2.2 Diffuse-Skylight Spectral Irradiance
 - 2.2.2.3 Adjacent-Terrain Spectral Irradiance
 - 2.2.3 Surface Reflectance
 - 2.2.3.1 Bidirectional Reflectance Distribution Function and Albedo
 - 2.2.4 Surface Emission
- 2.3 Surface-Energy Interactions
 - 2.3.1 Snow
 - 2.3.2 Glaciers
 - 2.3.3 Water
- 2.4 Complications
- 2.5 Space-Based Information Extraction
 - 2.5.1 Snow Cover
 - 2.5.2 Ice Sheets
 - 2.5.3 Alpine Glacier Mapping
 - 2.5.4 Debris-Covered Glaciers
 - 2.5.5 Snow Line and ELA
 - 2.5.6 Ice-Flow Velocities
- 2.6 Numerical Modeling
 - 2.6.1 Climate Modeling
 - 2.6.2 Energy-Balance Modeling
 - 2.6.2.1 Net Radiation
 - 2.6.2.2 Turbulent Heat Fluxes
 - 2.6.2.3 Ground Heat
 - 2.6.3 Glacier Mass-Balance Modeling
- 2.7 Conclusions
- 2.8 Appendices
 - 2.8.1 Notation

Acknowledgments
References

3 Radiative Transfer Modeling in the Cryosphere (*Roberto Furfaro, Alberto Preveti, Paolo Picca, Jeffrey S. Kargel, Michael P. Bishop*)

- 3.1 Introduction
- 3.2 Radiative Transfer Modeling of Glacier Surfaces and Lakes
 - 3.2.1 RT Modeling Approach for Glacier Surfaces
 - 3.2.2 Radiative Transfer Equation in Layered Mixtures of Snow, Ice, and Debris
 - 3.2.3 Radiative-Transfer Equation in Glacier Lake Waters
- 3.3 Optical properties of snow, ice, debris, mixtures, and glacier lake water
 - 3.3.1 Snow
 - 3.3.2 Glacier ice
 - 3.3.3 Rock Debris
 - 3.3.4 Mixtures
 - 3.3.5 Glacier Lake Water
- 3.4 Numerical Solution of the RTE
- 3.5 Glacier Radiative-Transfer Simulation Examples
- 3.6 Conclusions
- References

4 Glacier Mapping and Monitoring Using Multi-Spectral Data (*Andreas Kääh, Tobias Bolch, Kimberly Casey, Torborg Heid, Jeffrey S. Kargel, Gregory J. Leonard, Frank Paul, Bruce H. Raup*)

- 4.1 Introduction
- 4.2 Image Preprocessing
 - 4.2.1 Radiometric Calibration
 - 4.2.2 Geometric Preprocessing
- 4.3 Multi-Spectral Methods
 - 4.3.1 Spectral Reflectance of Glacier Surfaces
 - 4.3.1.1 Snow
 - 4.3.1.2 Ice
 - 4.3.1.3 Rock
 - 4.3.1.4 Water
 - 4.3.1.5 Vegetation
 - 4.3.2 Image Classification Approaches
 - 4.3.2.1 Hard and Soft Classification
 - 4.3.2.2 Manual, Supervised and Unsupervised Classification
 - 4.3.2.3 Parametric and Non-Parametric Classification
 - 4.3.2.4 Spatial and Spectral Segmentation
 - 4.3.2.5 Sub-Pixel Classification
 - 4.3.2.6 Combinations and Others
 - 4.3.3 Image Processing Techniques
 - 4.3.3.1 Manual Delineation
 - 4.3.3.2 False-Color Composites
 - 4.3.3.3 Calculation of Reflectance
 - 4.3.3.4 Spectral Transforms
 - 4.3.3.5 Image Algebra and Segmentation
 - 4.3.3.6 Unsupervised Classification

- 4.3.3.7 Supervised Classification
 - 4.3.3.8 Artificial Neural Networks
 - 4.3.3.9 Combinations
 - 4.3.4 Post-Processing and GIS Workflow
- 4.4 Mapping Debris-Covered Ice
- 4.5 Thermal Imaging
- 4.6 Microwave/SAR Methods
- 4.7 Spectral Change Detection and Temporal Data Merging
 - 4.7.1 Overview
 - 4.7.2 Image Change Evaluation by Subtraction of Multispectral Anniversary Pairs
 - (ICESMAP)
 - 4.7.2.1 Generalized ICESMAP Processing Steps
- 4.8 Ice Flow
 - 4.8.1 Image Choice and Preprocessing for Image Matching
 - 4.8.2 Image Matching Techniques
 - 4.8.3 Post-processing and Analysis
 - 4.8.4 Accuracy
 - 4.8.5 SAR Offset Tracking and Interferometry
- 4.9 Challenges, Conclusions and Perspectives
- Acknowledgments
- References

5 Digital Terrain Modeling and Glacier Topographic Characterization

(Duncan J. Quincey, Michael P. Bishop, Andreas Kääb, Etienne Berthier, Boris Flach, Tobias Bolch, Manfred Buchroithner, Ulrich Kamp, Siri Jodha Singh Khalsa, Thierry Toutin, Umesh K. Haritashya, Adina Racoviteanu, John F. Shroder Jr., Bruce H. Raup)

- 5.1 Introduction
- 5.2 Background
- 5.3 Digital Elevation Model Generation
 - 5.3.1 Source Data
 - 5.3.2 Aerial and Satellite Image Stereoscopy
 - 5.3.3 Ground Control Points
 - 5.3.4 Software Packages
 - 5.3.5 Post Processing (interpolation and smoothing)
 - 5.3.6 Data Fusion
- 5.4 DEM Error and Uncertainty
 - 5.4.1 Representation of DEM Error and Uncertainty
 - 5.4.2 Type and Origin of Errors
- 5.5 Geomorphometry
 - 5.5.1 Geomorphometric Land Surface Parameters
 - 5.5.2 Scale-Dependent Analysis
 - 5.5.3 Topographic Radiation Modeling
 - 5.5.4 Altitude Functions
 - 5.5.5 Glacier Elevation Changes and Mass-Balance Calculations
- 5.6 Glacier Mapping
 - 5.6.1 Pattern Recognition
 - 5.6.2 Artificial Intelligence Techniques
 - 5.6.3 Object-Oriented Mapping

5.7 Discussion
5.8 Conclusions
Acknowledgments
References

6 ASTER datasets and derived products for global glacier monitoring

(Bhaskar Ramachandran, John Dwyer, Bruce H. Raup, Jeffrey S. Kargel)

- 6.1 Introduction
- 6.2. ASTER Data Access and Use Policy
- 6.3. ASTER data
 - 6.3.1. Performance of ASTER VNIR, SWIR, and TIR
 - 6.3.1.1. Доверяй, но проверяй (doveryai, no proveryai; “Trust, but verify”)
 - 6.3.1.2. Performance Overview
 - 6.3.2.3. Radiometric Calibration
 - 6.3.2.4. Geometric Corrections
 - 6.3.2.5. Earth Rotation Angle Error
 - 6.3.1.6. Nutation-related Longitudinal Error
 - 6.3.2.7. Earth Ellipsoid-related Terrain Error
 - 6.3.2.8. Loss of SWIR
- 6.4. ASTER Data Processing Stream
 - 6.4.1. Standard Level-1A and Level-1B
 - 6.4.2. ASTER Standard Higher-Level Products
 - 6.4.2.1. Reflectance Suite
 - 6.4.2.2. Temperature/Emissivity Suite
 - 6.4.2.3. Detection Versus Full Resolution of Features in VNIR, SWIR,
and TIR
 - 6.4.2.4. Elevation Products
- 6.5. ASTER Data for GLIMS: STARS, DARs, Gain Settings, and Image Seasons
- Acknowledgments
- References

7 Quality in the GLIMS Glacier Database *(Bruce H. Raup, Siri Jodha Singh Khalsa, Richard Armstrong, William A. Sneed, Gordon S. Hamilton, Frank Paul, Fiona Cawkwell, Matthew J. Beedle, Brian P. Menounos, Roger D. Wheate, Helmut Rott, Shiyin Liu, Xin Li, Donghui Shangguan, G. Cheng, Jeffrey S. Kargel, C. F. Larsen, Bruce F. Molnia, Joni L. Kincaid, Andrew Klein, Vladimir Kononov)*

- 7.1 Introduction
- 7.2 Standard Methods and Tools
- 7.3 Accuracy and Precision in Glacier Mapping
- 7.4 The Glacier Analysis Comparison Experiments (GLACE)
 - 7.4.1 GLACE 1 and GLACE 2
 - 7.4.2 GLACE 2A and GLACE 3A (Manual Digitization)
- 7.5 GLACE Results
 - 7.5.1 GLACE 1 and GLACE 2
 - 7.5.2 GLACE 2A and GLACE 3A
 - 7.5.3 Discussion

- 7.6 GLIMS Glacier Database and the Data Ingest Process
 - 7.6.1 Ingest Quality Control Steps
 - 7.6.2 Representation of Measurement Error
 - 7.6.3 Derived Parameters in the Database
- 7.7 Conclusion
- Acknowledgments
- References

Part II Regional Chapters

8 Mapping of Glaciers in Greenland (*Leigh A. Stearns and Hester Jiskoot*)

- 8.1 Greenland Glaciology
 - 8.1.1 Ice Sheet Mass Changes
- 8.2 Case Study #1: Central East Greenland Margin Fluctuations and Climate Sensitivity from
 - a GLIMS Glacier Inventory and ASTER GDEM
 - 8.2.1 Introduction
 - 8.2.2 Methods
 - 8.2.3 Results
- 8.3 Case Study #2: A Comparison of High-Rate GPS and ASTER-Derived Measurements on
 - Helheim Glacier
 - 8.3.1 Introduction
 - 8.3.2 Data
 - 8.3.3 Results
 - 8.3.4 Discussion and Conclusion
- References

9 Remote Sensing of Recent Glacier Changes in the Canadian Arctic (*Martin Sharp, David O. Burgess, Fiona Cawkwell, Luke Copland, James A. Davis, E. K. Dowdeswell, J. A. Dowdeswell, Alex S. Gardner, Douglas Mair, Libo Wang, Scott N. Williamson, Gabriel J. Wolken, Faye Wyatt*)

- 9.1 Introduction
- 9.2 Regional Context
 - 9.2.1 Geology and Physiography
 - 9.2.2 Climate and Recent Climate Trends in the Canadian Arctic
 - 9.2.3 Glacier Characteristics
- 9.3 Special Topics: Regional Glacier Mass Balance and Proxy Indicators
 - 9.3.1 Surface Mass Balance and Mass Balance Changes
 - 9.3.2 Summer Melt
 - 9.3.3 Ice Flow and Iceberg Calving Fluxes
- 9.4 Case Studies
 - 9.4.1 Surge-Type Glaciers
 - 9.4.2 Northern Ellesmere Island Ice Shelves
- 9.5 Regional Synthesis: Recent Changes in Equilibrium Line Altitude and Glacier Extent
 - 9.5.1 Methodology
 - 9.5.2 Results
- 9.6 Key Issue

9.6.1 Changes in Glacier Surface Elevation, Volume and Mass; Sea Level Contributions

9.7 Summary and Conclusions

References

10 A Digital Glacier Database for Svalbard (*Max König, Christopher Nuth, Jack Kohler, Geir Moholdt, Rickard Pettersen*)

10.1 Introduction

10.2 Regional Context

10.3 Database Structure

10.4 Data

10.4.1 The Original Topographic Map of Svalbard (S100) - 1936 / 1966 / 1971

10.4.2 The 1990 Photogrammetric Survey

10.4.3 The Satellite Dataset

10.5 Methodology

10.5.1 Creation of Glacier Outlines from Cartographic Data for the 1936/66/71 Dataset

10.5.2 Creation of Outlines from Cartographic Data for the 1990 Dataset

10.5.3 Creation of Outlines from Satellite Data for the 2001-2010 Dataset

10.5.4 Glacier and Snow Patches Smaller than 1 km²

10.6 Results

10.7 Conclusions and Future Perspectives

Acknowledgments

References

11 Glaciers of Kenai Fjords National Park and Katmai National Park and Preserve, Alaska (*Bruce A. Giffen, Dorothy K. Hall, Janet Y. L. Chien*)

11.1 Introduction

11.2 Regional Context

11.2.1 Geographic, Topographic, and Environmental Setting

11.2.2 Climate

11.2.3 Glacier Characteristics - Kenai Fjords National Park

11.2.4 Glacier Characteristics - Katmai National Park and Preserve

11.3 Procedures for Analysis of Glacier Changes

11.3.1 Imagery Classification

11.3.2 Complicating Issues

11.3.3 Manual Editing

11.4 Satellite Imagery Interpretation Accuracy

11.5 Areal Extent - Glacier Ice

11.5.1 Kenai Fjords National Park

11.5.2 Katmai National Park and Preserve

11.6 Terminus Position Measurements

11.6.1 Methodology

11.6.2 Kenai Fjords National Park

11.6.3 Katmai National Park and Preserve

11.7 Discussion and Conclusions

References

12 Glacier Dammed Lakes, Alaska (*David F. G. Wolfe, Jeffrey S. Kargel, Gregory J. Leonard*)

- 12.1 Introduction
- 12.2 Regional Context
 - 12.2.1. Geographic Setting
 - 12.2.2. Climate
 - 12.2.3. Previous Research
- 12.3. Methods
 - 12.3.1. Horizontal attributes
 - 12.3.2. Mean Glacier Altitude (MGA)
 - 12.3.3. Glacier-Stream Order (complexity)
 - 12.3.4. Glacier Surface Gradient
 - 12.3.5. Damming Glacier Origin and Terminus Types, and Minimum-Maximum Altitudes
 - 12.3.6. Aspect of the Icedam and of the Damming Glacier
- 12.4. Results
 - 12.4.1. Changes Over Time: Lake-Damming Glaciers
 - 12.4.1.1. Damming Glacier Origin Data
 - 12.4.1.2. Damming Glacier Termini Data
 - 12.4.1.3. Damming Glacier Complexity
 - 12.4.1.4. Damming Glacier Gradient
 - 12.4.2. Changes Over Time: Glacier Dammed Lake Population
 - 12.4.2.1. Lake Location Along the Damming Glacier Margins: Absolute and Proportional Shifts
 - 12.4.2.2. Lake Hypsography: Above Sealevel and Below Mean Glacier Altitude (MGA)
 - 12.4.2.3. Aspect of Ice Dam Populations
 - 12.4.2.4. Ice Dam and Lake Type Changes Through Time
 - 12.4.2.5. Changes in Big Lakes and Some Notable Anecdotes
- 12.5 Case study: Iceberg Lake
 - 12.5.1. Overview
 - 12.5.2. Satellite Observations
 - 12.5.3. Field Observations
 - 12.5.4. Satellite-era Hydrology
 - 12.5.5. Possible Causes of Iceberg Lake's Dynamical Evolution
- 12.6. Discussion and Conclusions
- 12.7 Appendices
 - 12.7.1. Study Area Lakes and Locations
 - 12.7.2. Study Area Lake Attributes
 - 12.7.3. Study Area Glacier Properties

13 Multispectral Image Analysis of Glaciers in the Chugach Mountains, Alaska (*Jeffrey S. Kargel, Matthew J. Beedle, Andrew B.G. Bush, Francisco Carreño, Elena Castellanos, Umesh K. Haritashya, Gregory J. Leonard, Javier Lillo, Ivan Lopez, Mark Pleasants, Edward Pollack, David F. G. Wolfe*)

- 13.1 Introduction
- 13.2. Regional Context

- 13.2.1. Geological Context
- 13.2.2. Climatic Context: Descriptive Overview and Down-Scaled Model
- 13.2.3. Regional Significance of Glaciers in the Chugach/St. Elias Mountains
- 13.3. Case Studies: Glacier Inventorying and Assessment of Glacier Dynamics
 - 13.3.1. A preliminary Inventory of the Bering-Malaspina Glacier Complex
 - 13.3.1.1. Towards a Comprehensive Inventory in a Region of Superlatives
 - 13.3.1.2. Data, Methods, and Errors
 - 13.3.1.3. Results
 - 13.3.1.4. Implications/Discussion
 - 13.3.2. Glaciers of College Fjord: Harvard and Yale Glaciers
 - 13.3.2.1. College Fjord Overview and Data Availability
 - 13.3.2.2. Retreating Yale Glacier and Advancing Harvard Glacier
 - 13.3.2.3. DEM Generation and Analysis
 - 13.3.3. Scott Glacier
 - 13.3.4. Glaciers of the Copper River Corridor: Childs, Miles, and Allen Glaciers
 - 13.3.4.1. Calving Glaciers and Near Damming of the Copper River.
 - 13.3.4.2. Miles Glacier and Glacial Aneurysms, Not Surging, as a Cause of Crenulated Medial Moraines
 - 13.3.4.3. Childs Glacier: Exemplifying How Difficult it is for a Glacier to Dam a Perennial River
 - 13.3.4.4. Allen Glacier: A Century of Decay of a Mighty Piedmont Glacier
- 13.4. Conclusions
- Acknowledgments

14 Remote Sensing of Glaciers in the Canadian Cordillera, Western Canada (Roger D. Wheate, Etienne Berthier, Tobias Bolch, Brian P. Menounos, Joseph M. Shea, John J. Clague, Erik Schiefer)

- 14.1 Introduction
- 14.2 Regional Context
 - 14.2.1 Topographic Setting
 - 14.2.2 Climate
 - 14.2.3 Glacier Distribution and Characteristics
- 14.3 Special Topics and Case Studies
 - 14.3.1 Glacier Hazards
 - 14.3.1.1 Outburst Flood from Queen Bess Lake, 1997
 - 14.2.1.2 Outburst Floods from Summit Lake
 - 14.3.1.3 Tulsequah Glacier and its Lakes
 - 14.3.1.4 Capricorn Creek Landslide, 2010
 - 14.3.2 Glacier Changes
 - 14.3.2.1 Bridge Glacier, Southern Coast Mountains, British Columbia
 - 14.3.2.2 Dusty and Lowell Glaciers, Yukon
- 14.4 Regional Glacier Inventories and Synthesis
 - 14.4.1 British Columbia and Alberta
 - 14.4.2 Yukon

14.5 Concluding Remarks
Acknowledgments

15 ASTER and DEM Change Assessment of Glaciers Near Hoodoo Mountain, British Columbia, Canada (*Jeffrey S. Kargel, Gregory J. Leonard, Roger D. Wheate, Benjamin Edwards*)

15.1 Introduction
15.2 Geologic and Climatic Context
15.3 Special Topics
15.3.1 ASTER Image Differencing
15.3.1.1 2002/2003 Image Pair: A Record of Annual Changes
15.3.1.2 2003/2010 Image Pair
15.3.2 Topographic Differencing of Hoodoo Mountain and Vicinity: Analysis of 4-Time Series of DEMs
15.3.3 Mass Balance of Glaciers in the Hoodoo Mountain Study Region
15.3.4 Ground and Air Photo Assessment of Glacier Changes on Hoodoo Mountain and Vicinity
15.3.4.1 Twin Glacier
15.3.4.2 Hoodoo Glacier
15.3.4.3 Hoodoo Mountain Ice Cap
15.3.5 Glacier and Climate Changes in the Vicinity of Hoodoo Mountain
15.3.5.1 Climate Records
15.3.5.2 Inferences for Glacier Response Times
15.3.5.3 Figure of Merit for Climate Change and Energy Requirements to Drive Glacier Thinning
15.4 Synthesis and Conclusions
Acknowledgments

21 Satellite Inventory of Glaciers in Turkey (*Mehmet Akif Sarikaya, Ahmet Emre Tekeli*)

- 21.1 Introduction
- 21.2 Regional Context
 - 21.2.1 Topography
 - 21.2.2 Climate
- 21.3 Methods
- 21.4 Occurrences of Glaciers
 - 21.4.1 Glaciers in the Southeastern Taurus Mountains
 - 21.4.1.1 Buzul Mountains
 - 21.4.1.2 İkiyaka Mountains
 - 21.4.2 Glaciers in the Coastal Ranges of the Eastern Black Sea
 - 21.4.3 Glaciers on Individual Mountains
 - 21.4.3.1 Mount Ağrı (Ararat)
 - 21.4.3.2 Mount Erciyes
 - 21.4.3.3 Mount Süphan
 - 21.4.3.4 Mercan Mountains
- 21.5 Occurrences of Rock Glaciers
 - 21.5.1 Kavuşşahap Mountains
 - 21.5.2 Soğanlı Mountains
 - 21.5.3 Rize Mountains
 - 21.5.4 Karaçal Mountains
 - 21.5.5 Mount Erciyes
 - 21.5.6 Mercan Mountains
 - 21.5.7 Esence Mountains
- 21.6 Summary and Conclusions
- 21.7 Appendices
 - 21.7.1 Specification of Turkish glaciers and rock glaciers
- Acknowledgments

22 Recent Glacier Changes in the Mongolian Altai Mountains: Case Studies from Munkh Khaikhan and Tavan Bogd (*Brandon S. Krumweide, Ulrich Kamp, Gregory J. Leonard, Avirmed Dashtseren, Michael Walther*)

- 22.1 Introduction
- 22.2 Regional Background
 - 22.2.1 Quaternary History of Glaciers in the Mongolian Altai
 - 22.2.2 Recent History of Glaciers in the Mongolian Altai
- 22.3 Regional Context and Study Areas
 - 22.3.1 Geography and Climate
 - 22.3.2 Munkh Khaikhan Range
 - 22.3.3 Tavan Bogd Range
- 22.4 Data and Methods
 - 22.4.1 Topographic Maps
 - 22.4.2 Satellite Imagery
 - 22.4.3 GPS Data
 - 22.4.4 Pan-sharpening
 - 22.4.5 Glacier Mapping
 - 22.4.6 Error Analysis (Area Accuracy and Precision of Change)
 - 22.4.7 Digital Elevation Models
 - 22.4.8 DEM-Derived Datasets
 - 22.4.9 Geomorphometric Analysis

- 22.5 Results
 - 22.5.1 Glacier Changes in the Munkh Khairkhan Range
 - 22.5.2 Glacier Changes in the Tavan Bogd Range
- 22.6 Discussion
 - 22.6.1 Munkh Khairkhan Range
 - 22.6.2 Tavan Bogd Range
- 22.7 Conclusions

23 Remote Sensing of Glaciers in Afghanistan and Pakistan (*Michael P. Bishop, John F. Shroder Jr., Ghazanfar Ali, Andrew B. G. Bush, Umesh K. Haritashya, Rakshan Roohi, Mehmet Akif Sarikaya, Brandon J. Weihs*)

- 23.1 Introduction
- 23.2 Regional Context
 - 23.2.1 Geology
 - 23.2.2 Topography
 - 23.2.3 Climate
 - 23.2.4 Glaciers
 - 23.2.4.1 Afghanistan
 - 23.2.4.2 Pakistan
- 23.3 Methodology
- 23.4 Case Studies
 - 23.4.1 Afghanistan
 - 23.4.1.1 Mir Samir
 - 23.4.1.2 Daste Wer
 - 23.4.1.3 Balacomar
 - 23.4.1.4 Bandaka
 - 23.4.1.5 Badakshan
 - 23.4.1.6 Wakhan Pamir
 - 23.4.2 Pakistan
 - 23.4.2.1 Hindu Raj
 - 23.4.2.2 Central Karakoram
 - 23.4.2.3 Nanga Parbat Himalaya
- 23.5 Regional Synthesis
 - 23.5.1 Afghanistan
 - 23.5.2 Pakistan

24 Himalayan Glaciers (India, Bhutan, Nepal) (*Adina Racoviteanu, Yves Arnaud, I.M. Baghuna, Samjwal Bajracharya, Etienne Berthier, Rakesh Bhambri, Tobias Bolch, Martin E. Byrne, R.K Chaujar, Andreas Käab, Ulrich Kamp, Jeffrey S. Kargel, Anil V. Kulkarni, Gregory J. Leonard, Pradeep Mool, Regula Frauenfelder, I. Sossna*)

- 24.1 Overview
- 24.2 Regional Context
 - 24.2.1 Geographic, Geologic and Topographic Setting
 - 24.2.2 Climate Dynamics and Glacier Regimes

- 24.2.3 Previous Glacier Mapping and Observations
- 24.3 Case Studies and Specific Topics
 - 24.3.1 Sikkim Himalaya: Glacier Area Changes, 1960 – 2000
 - 24.3.1.1 Introduction
 - 24.3.1.2 Methods
 - 24.3.1.3 Results: Glacier Area Changes
 - 24.3.1.4 Summary of Findings
 - 24.3.2 Khumbu and Garhwal Himalaya: Glacier Area and Thickness Changes, 1960's – 2000's
 - 24.3.2.1 Introduction
 - 24.3.2.2 Methods
 - 24.3.2.3 Results
 - 24.3.2.4 Summary of Findings
 - 24.3.3 Everest Region, Nepal: Geomorphologic and Surface Reflectance Changes, 2001 – 2005
 - 24.3.3.1 Introduction
 - 24.3.3.2 Methods
 - 24.3.3.3 Results
 - 24.3.3.4 Summary of Findings
 - 24.3.4 Brahmaputra River basin: Glacier Area, Volume and Velocity Changes, 1970s ~ 2000
 - 24.3.4.1 Introduction
 - 24.3.4.2 Methods
 - 24.3.4.3 Results: Glacier Area Changes
 - 24.3.4.4 Results: Glacier Volume Changes
 - 24.3.4.5 Results: Glacier Velocities
 - 24.3.4.6 Summary of Findings
 - 24.3.5 Ladakh, North-western Indian Himalaya: Glacier Length/Area Changes, 1975 – 2008
 - 24.3.5.1 Introduction
 - 24.3.5.2 Methods
 - 24.3.5.3 Results
 - 24.3.5.4 Summary of Findings
 - 24.3.6 Himachal Pradesh and Uttarakhand, Western Indian Himalaya: Glacier Area , 1962 – 2004
 - 24.3.6.1 Introduction and Methods
 - 24.3.6.2 Results
 - 24.3.6.3 Summary of Findings
 - 24.3.7 Himachal Pradeshh, Western Himalaya: Geodetic Mass balance Estimates, 1999 – 2004
 - 24.3.7.1 Introduction
 - 24.3.7.2 Methods
 - 24.3.7.3 Results
 - 24.3.7.4 Summary of Findings
- 24.4 Summary and Outlook
- 24.5 Appendices
 - 24.5.1 Image Differencing: Methodology, Limitations, and Errors

25 Glaciers in China and Their Variations (Shiyin Liu, Donghui Shangguan, Junli Xu, Xin Wang, Xiaojun Yao, Zongli Jiang, Wanqin Guo, Anxin Lu, Shiqiang Zhang, Baisheng Ye, Zhen Li, Jungfeng Wei, Lizong Wu)

- 25.1 Introduction to Glaciers in China
- 25.2 Regional Context
- 25.3 Methods for Glacier Change Monitoring by Remote Sensing
- 25.4 Glacier Area Extent Changes
 - 25.4.1 Glacier Changes Since the Maximum of the Little Ice Age
 - 25.4.2 Glacier Changes During the Recent Decades
 - 25.4.2.1 Qilian Shan
 - 25.4.2.2 Tianshan
 - 25.4.2.3 Eastern Pamir Plateau
 - 25.4.2.4 Karakoram
 - 25.4.2.5 Tibetan Plateau
 - 25.4.2.6 Integration
- 25.5 Changes in Surface Elevations
 - 25.5.1 Keqikar Baxi Glacier
 - 25.5.2 Yanglong River
- 25.6 Surface Movement Derived by Satellite Remote Sensing
 - 25.6.1 Justification
 - 25.6.2 Glacier Velocity Derived by D-InSAR and SAR Feature-Tracking

Methods

- 25.6.3 Glacier Velocity Derived by Optical Images
- 25.7 Special Topics: Applied Hydrological Aspects of Chinese Glacier

Dynamics

- 25.7.1 Special Topic 1: Glacier Hazards in the Upper Yalung Zangbo River Basin, China
 - 25.7.1.1 Pumqu Basin
 - 25.7.1.2 Poiqu Basin
 - 25.7.1.3 Palongzangbu River Basin
 - 25.7.1.4 Niyang River Basin
 - 25.7.1.5 Nianchu River Basin
 - 25.7.2 Special Topic 2: Glacier Water Resources in Western China Provinces
 - 25.7.2.1 The Influence of Glacier Changes on Water Resources
 - 25.7.2.2 Volume Changes of Glaciers
 - 25.7.2.3 Potential Influences of Glacier Changes in the Future
 - 25.8 Summary and Future Prospects

Part III Summary

33 Summary and the Global Context of Key Findings (*Jeffrey S. Kargel, Andrew B. G. Bush, J. Graham Cogley, Gregory J. Leonard, Bruce H. Raup, Claudio Smiraglia, Massimo Pecci, Roberto Ranzi*)

33.1 Overview

33.2 Summary: The Foundations of Glacier Remote Sensing Science (Chapters 2-7)

33.3 Super-regional Narratives of Glacier Dynamics

33.3.1. Glacier Changes in the Arctic Super-region (Greenland and the Canadian High Arctic)

33.3.2. Glacier Changes in the North Atlantic Super-region (Iceland, Norway and Svalbard)

33.3.3. Glaciers in the North American Cordilleran Super-region (U.S. and Western Canada)

33.3.4. Glacier Changes in the Mediterranean Super-region

33.3.5. Glacier Changes in the South and Central Asia Super-region

33.3.6. Glacier Changes in the Northern Andes

33.3.7. Glacier Changes in the Southern Ocean Super-region

33.3.8. Seasonal Thaw in a Blue-ice Area of the Antarctic Interior

33.4. Summary Discussion: Causes of Glacier Fluctuations

33.4.1. Global trends in glacier and ice sheet mass balance and sea level trends

33.4.2. Global Warming: First-order Cause of the Modern-day Retreat and Thinning of Glaciers

33.4.3. What Drives Variability in Glacier Responses to the Changing Global Environment?

33.4.4. Glacier Change is Heterogeneous and Multivariate

33.4.5. Variable Response Times as a Further Cause of Heterogeneous Glacier Responses

33.4.6. Other Causes of Glacier Variability of Response Dynamics

33.4.7. The Things We Don't Know (but Will Affect Glaciers and Us)

33.4.7.1. Extreme Weather

33.4.7.2. Reduction of Sea Ice

33.4.7.3. Shifting Thermohaline Circulation

33.4.7.4. Release of Methane from Seafloor and Lowland Permafrost Methane Clathrate

33.4.7.5. Do Glaciers Show Evidence of Major Regime Shifts?

33.5. The Public's Two Big Questions

33.6. Conclusions

Acknowledgments
